CeminSeal Wallboard

CEMINSEAL® WALLBOARD

CeminSeal Wallboard is a superior wet area internal lining and tile substrate product designed and tested for compliance and peace of mind.

Do it once... do it properly.

CeminSeal® Wallboard is manufactured in Australia and uses Cemintel's unique CeminSeal® water block technology, repelling water, increasing paint adhesion and aiding moisture management in the places that can't be seen. It is applied to the face of the panel and has been tested to show higher water resistance when compared to wet area plasterboard and other products on the market.

The smooth finish of CeminSeal Wallboard means less work for fixing and setting and provides an extremely smooth paint surface when not tiled over.

It is available in either recessed or square edge options.

Why would you use anything else?
