PLANK & CLADDING

Cladding

Cemintel Cladding provides a lightweight panel solution in a most simple and traditional form. Panels are manufactured in Australia utilising a full steels process and are clean and smooth, providing a better painted finish.
The panels are very easy to install with traditional nail-on-frame methods, as well as an option for a drained cavity cladding solution. Available in a range of sizes that make it versatile in application with minimal waste.

Smooth Plank

Cemintel Smooth Plank provides a flexible, external cladding option ideally used as a complete external cladding system, or for second storey additions. Planks are available in two widths and can be painted, or stained, to create the desired finish.

Woodgrain Plank

Cemintel Woodgrain Plank is ideally used as a complete external cladding system, or for second storey additions. Planks are available in two widths and can be painted, or stained, to create the desired finish. Woodgrain Plank provides a flexible, external cladding option.
