WEATHERBOARDS

Endeavour – Headland – Scarborough

Endeavour® Weatherboards

Endeavour has a traditional look that creates a linear, flat profile with a slight beveled detail. This pre-primed weatherboard is double width, which provides a faster installation. It has an overlap that conceals fixings, giving the final paint finish a smooth appearance.

Headland® Weatherboards

A more traditional weatherboard, Headland has a sharp edged, linear recess. It provides a classic Australian feel that allows a variety of standalone or composite designs. This weatherboard is fixed in a ship-lapped manner with a 25mm overlap, which conceals fixings and is simple to install. The weatherboards are primed and ready for painting.

Scarborough™ Weatherboards

A modern take on traditional weatherboard, Scarborough is a stylish product with strong shadow lines that will enhance both traditional and contemporary residential designs. Scarborough has a concealed fixing system and a square profile so the boards butt together and provide a flat surface finish. The panels are pre-primed and gun available.
