NON-COMBUSTIBLE PRE-FINISHED ALUMINIUM PANELS

MondoClad.

NON-COMBUSTIBLE ALUMINIUM PANELS

MondoClad® is non-combustible, durable, and can be easily folded into cassettes, meaning that even the most ambitious creative vision can be realised.

Carefully designed by industry experts to enhance the buildings of today and tomorrow, these pre-painted aluminium panels are offered in colours that are both contemporary and timeless.

Colour that lasts

The superior PVDF architectural coating of MondoClad offers excellent UV stability and colour retention. MondoClad® offers a 15 year warranty, available on application and subject to approval. MondoClad® is becoming the new face of architecture across the country.

Installation of metallic panels

To avoid possible differences in levels of light reflectivity, panels are best installed in the direction indicated on the protective peel-off foil.

Colour variations may occur between panels originating from different production batches. To ensure colour consistency, the total panel requirement for a project should be placed in a single order.

METALLIC

The MondoClad® Metallic colour range makes a distinctive design statement on any skyline.

From rich gold and copper to shades of silver and grey, these metallic panels catch the sunlight, creating a striking visual mix of gleaming façades and shadows.

COPPER PENNY

Colours displayed on this colour card are a guide only and have been matched as close as possible to production standards under daylight conditions. Due to the nature of the printing process some degree of colour and gloss level variation may occur. Where more than one finish is available product colour may vary. We recommend that you use production line prepared samples for final colour selection or approval.

SOLID

Bright, subtle, bold or neutral, the MondoClad® Solid colour range is offered in soft natural tones and vibrant hues that enhance any architectural design. Covered in a tough, PVDF coating, the panels retain both colour and gloss and do not chip or peel.
