Strong and durable, Steel-Line garage doors are made in Australia for the harsh Australian conditions.

Steel-Line supports Australian jobs which is why our garage doors are predominately made with the highest quality Australian BlueScope® steel.

A trusted Australian brand, Steel-Line have been making garage doors for Australians by Australians for over 40 years.

Award-winning FingerProof™ Safety design is a **standard feature** for Steel-Line sectional doors.

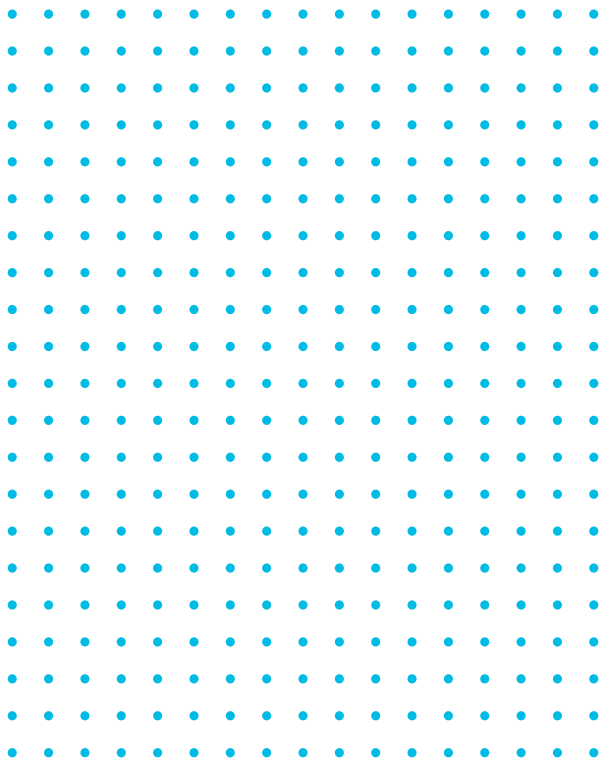

Every garage door is custom made and manufactured to your requirements. It's one of the reasons the majority of Australia's major builders choose Steel-Line garage doors.

Steel-Line offer a full range of accessories to suit your personal needs. View our range from page 53.

See which door suits your home with our online visualiser: steel-line.com.au

Steel-Line have been makers and inventors of garage doors in Australia for over 40 years.

Strong, safe and durable, we make with passion to enhance your lifestyle. It's at the core of what we do.

Our award-winning doors are the preferred choice for most major Australian builders.

Every door is custom manufactured for your home.

The garage more Australians come home to every day.

INSPIRATIONS

Face Fixed Aluminium Frame Doors

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximize the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, making them well suited to bearing the tough conditions of the Australian climate. Our face fixed design is lightweight, weather-resistant, has a maximum wind rating of C3 for wind regions C and D in Australia.

Tilt Doors

Not enough room in your garage for a sectional or roller door? A lot of older garages can be quite limited in space.

Steel-Line tilt garage doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Manufactured to fit most garage openings and easily installed, the tilt garage door offers safety, security and convenience in a wide range of colours and materials.

The choices of material is almost as varied as your imagination allows and commonly includes plywood and moulding, K-panel, Colorbond®, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/ acrylic, and many other types of cladding.

NOTE: Not all options available in all markets. Please refer to your Product Consultant for our wide variety of design options in your area.

Louvre Garage Door in Colorbond® Surfmist® colour.

Louvre Doors

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. It's ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments.

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012 (also available for C2 & C3).

The Timber Look Series

Your garage door is often the largest and most prominent frontal feature of your home. For this reason, choosing the right garage door is a crucial decision that can significantly influence the value and aesthetics of your most prized asset.

If you like the natural look and warmth that wood conveys, we can offer you Natural Timber, DecoWood®, Colorbond®, UniCote® LUX Timbers of the World and our Biowood® series.

Each offering has different benefits depending on your requirements, while providing the warm and homey charm that a timber look provides.

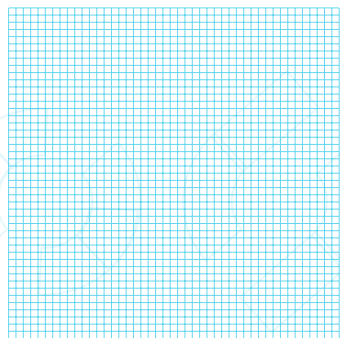

Our impressive assortment of beautifully crafted options offers a classic and timeless style that evokes a feeling of tradition with a modern twist.

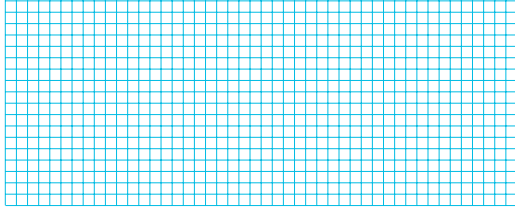

The above is one of our Natural Timber Garage Doors with V joint profile.

You dream it, we create it.

Natural Timber Selection

Stand out from the crowd with a door as unique as you.

As our timber garage doors are custom designed and manufactured, you can rest assured we will create a product to meet your dimensions and requirements. No matter what shape or size your garage is, a timber door can be made to suit it - and it will look fantastic.

And because this range is custom-built using natural products, you can look forward to having a truly one-of-a-kind garage door that has its own unique look and character.

The most popular timber used in this range is Western Red Cedar, a lightweight yet solid timber that looks equally beautiful on a renovated or new home being built.

Timbers of the World Series

The UniCote® LUX - Timbers of the World Series draws inspiration from all over the globe to bring the beautiful natural look of timber to your front door.

Drawing inspiration from around the world, UniCote® LUX offers a range of timber finishes to suit your next project. With the strength of steel, UniCote® LUX products are manufactured and tested to meet all weather conditions to offer you a long lasting product and peace of mind. UniCote® LUX is continually tested to meet rigorous Australian Standards (AS2728: 2013 & AS1397: 2011).

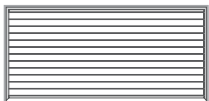

UniCote® LUX paint systems are proven to provide resistance to chipping, peeling or cracking, offering excellent colour and gloss retention.

Timber Selection

The DecoWood® garage door is ideal for coastal properties and bushfire prone areas with its marine grade powder coating. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance.

Unlike timber, DecoWood® garage doors don't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

Steel-Line's BioWood® garage door retains the natural look and feel, is low maintenance and meets the standard for fire safety under BAL-29 conditions.

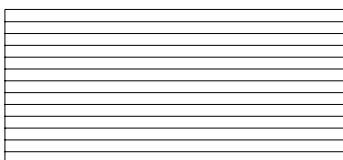

There are several good reasons to choose a BioWood® garage door for your home. BioWood® wood composite products are created using 0.85 density natural cellulose fibre from plantation harvested timber combined with a specially formulated resin. It retains the aesthetic natural look and feel of wood, is lightweight, provides a high degree of water resistance, does not bleach, split, crack, and is suitable for both bushfire regions up to BAL-29 conditions; as specified in AS3959-2018 Construction of Building in bushfire prone areas Appendix F; and marine applications. The product is termite resistant, low maintenance and is green certified by Global Green Tag. It is the perfect durable product for all building applications.

Wind rated Slimline Sectional Garage Door in Colorbond® Jasper®.

Strut-Lock™ Wind Rated Sectional Garage Doors

The Strut-Lock door is post free, incorporating the use of heavy duty struts, robust commercial hinges, top brackets in combination with a unique stile reinforcement to provide maximum resistance to forces exerted by cyclonic and high winds up to 5.5m (also available for C2 & up to N4).

Wind Rated Wind Brace Sectional Garage Doors

The Wind Brace design feature with removable steel wind brace post(s) is installed to the sectional garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation. C2 up to 6.5m & up to N4.

Wind Rated Windlock Roller Doors

The windlock roller doors are designed to provide additional reinforcement in pressure conditions caused by strong winds from extreme weather. They have been widely used for homes, sheds, commercial and industrial warehouses in high wind prone/ cyclone areas (also available for C2 & up to N4).

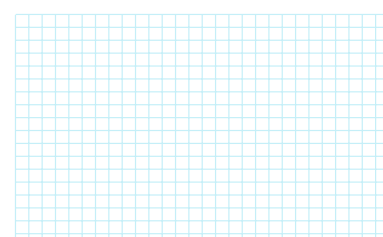

Commercial and Industrial Doors

Steel-Line offer a range of commercial and industrial closures in partnership with Arco Architectural Systems that combine strength, security and reliability. We offer high quality products, exceptional customer service and real value for money within the commercial and industrial space.

Our products are typically customised to suit project specific criteria. In particular, roller shutters and roller grilles are usually individually designed to suit architectural, ventilation and aesthetic requirements.

Steel-line and Arco Architectural Systems assist in all stages of the construction process - from design specifications through to estimating, project management, supervision of the installation and efficient after sales service.

We're better together.
We are makers for life.

At Steel-Line, we're not just makers and inventors of garage doors, we believe we are makers to the core.

We constantly strive to make things that don't just last a life-time but improve life. We are makers for life.

A photograph showing the back of a car with its trunk open. A young boy and a young girl are sitting on the trunk. The boy is wearing yellow sunglasses and has his mouth open as if shouting or singing. The girl is wearing red heart-shaped sunglasses and is talking on a mobile phone. They are surrounded by various toys, including a large stuffed dog, a teddy bear, and a soccer ball.

HOME ENHANCERS

At Steel-Line, we have **accessories** to suit your needs including emergency key release, digital keyless entry, multi functional hand transmitter, key switch entry, photo eye protection, and flexibility to adapt other brands of receivers.

Photo Electric Beams

The Photo Electric Beam is designed to detect an obstruction while the door is closing and to send a signal to the opener to reverse or stop the door movement. It helps to protect your family from injury and your car from the damage caused by contact.

Wireless Security Keypad

The security keypad can be programmed with multiple, unique user codes. It is perfect for the family, trades people, or even just going for a walk. This means you can leave your keys at home with the peace of mind that your home is secure.

Additional Handsets

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Brush Seal

A tough and durable brush seal can help better protect your garage from the elements and satisfies the bushfire area standard AS3959-2009 for protecting against fire embers entering the garage.

powermesh

simply safer

Control your garage door anytime, anywhere with the Powermesh home automation system. For more information see page 8-9.

Powermesh products work with the Zimi home ecosystem. Make your life easier and get connected today. www.zimi.life

Battery Backup

The Marantec Comfort 380 is available with a battery backup that provides an energy supply in the event of a power cut.

Emergency Key Release

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Wireless Wall Mounted Remote

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Garage Door Insulation

Steel-Line garage door insulation minimises the effects of the harsh Australian climate, by reducing heat loss and heat gain transferring through the door panel.

Only available with Colorbond Sectional/Smooth and Powdercoat doors.

Cut energy costs

Automatic garage locking system providing enhanced security for you, your family and your home.

SECURA-LOCK

Garages can often be the entry point for intruders as they not only contain high value and portable items such as cars and bikes, but also can often provide internal and discrete access to your home. The Marantec Secura-Lock offers you security and peace of mind.

How it works?

The Marantec Secura-Lock has been designed using advanced German technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position, providing you additional security and protection.

When opening, the locking pin will automatically retract, disengaging the Secura-Lock and allowing the door to raise to position.

Features

German engineered with the latest electronic technology to offer optimum protection

High quality, slim, attractive aesthetic enhances its sophisticated design

Effortless installation and integration with Marantec sectional door openers

Simple disengagement in the event of power failure

Set and forget. No regular charging or battery changing requirement

NOTE: Compatible with double or single sectional garage doors.

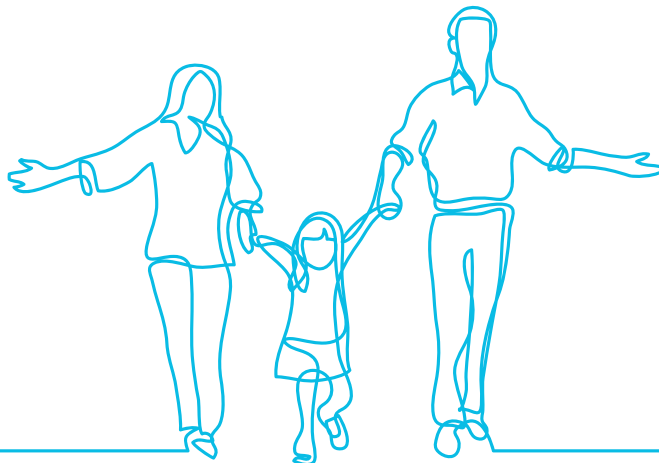

STEP FIVE: SELECT A SERVICE CARE PLAN

Service Care Plan

With a Steel-Line Garage Door Service Plan you can enjoy peace of mind for less with our 3 and 5 year service plans at a much lower cost.

Reassurance will only cost one upfront payment and will ensure your door is always under warranty. Steel-Line Garage Doors has qualified Garage and Roller Door Service Technicians on-hand to service or repair your garage door.

With one upfront payment, you save money and can rest assured your door remains in tip top condition and fulfils your warranty condition to service your door annually.

Steel-Line Door Service Plan Key Benefits:

- Available Australia wide
- Significant savings with one up front payment
- Guarantee your garage door is serviced by Steel-Line qualified technicians
- Assurance your garage door is working in peak condition with regular check ups

3 and 5 year service plans available.

Ask your local branch about how to sign up for a plan today.

Terms and Conditions:

- Service care plan is only available on doors 11 months old or less.
- Parts are not included.
- Only applicable to the doors fitted and is not transferable.

Buy Now. Pay Later.

zip.co/apply

Zip is an easy and flexible payment method which gives you the freedom to buy now and pay later. There are two reusable account types, Zip Pay and Zip Money. Repayments are flexible to suit your lifestyle - weekly, fortnightly or monthly, and you can pay as much as you like as long as you meet your minimum monthly repayments (advised at the time of sign up).

Zip Account

Apply for reusable Zip account with a limit that suits your needs.

Payment Flexibility

Everyone's different. That's why Zip lets you tailor your payments to suit your lifestyle.

Interest Free

Up to 12 months interest free.
