# A MESSAGE FROM OUR GENERAL MANAGER

Dear valued customer,

Firstly, and most importantly, thank you for your continued support of Clennett's Mitre 10, our network and our people. Our commitment to the local community, our partnership with our customers and our suppliers is paramount to our joint success and we again thank you for making Clennett's Mitre 10 your preferred supplier for Building materials.

Throughout the year we work with our suppliers to offer exceptional value and quality in the products and solutions we offer, underpinned by our commitment to service. This year's deal book reflects our collective commitment to being the best supplier of building materials in Tasmania. Thank you to our suppliers for their time in attending the Clennett's Expo and showcasing their new innovative building products and solutions and for their support throughout the year. We are certain you will see the advantage in taking up these deals as you seek to add value to your business while also having the opportunity to win one of many prizes, including the major prize of a Stadium Experience of your choice.

Without our supply partners, these nights and events would not happen, we truly appreciate the commitment of our suppliers to Clennett's and you, our customers.

Clennett's Mitre 10 employ 280 locals, inclusive of a large team of specialist trade account managers who are here to support you and provide tailored solutions in your procurement. Our network of stores provide convenient locations near your building sites to reduce your travel and downtime when collecting materials, alternatively our expanded delivery options keep you onsite.

Once again thank you for your continued loyalty and support of the Clennett's Mitre 10 business, I look forward to seeing you at the Clennett's Mitre 10 2026 Trade Expo!

As always, please feel free to reach out should you need any further assistance. My contact details are below. I have also included the key contacts for our Executive Trade team representatives.

We look forward to building with you well into the future!

Kind Regards,

## Why choose Everdeck®

### Made in Australia

Everdeck decking boards are manufactured in Tasmania. They are designed to withstand tough Australasian conditions such as harsh sun and UV exposure, or wet and damp environments.

### Simple to install

Everdeck's concealed fastening system has been designed to make installation easy. Our installation resources are suitable for both DIY and professional installers.

### Engineered to last

Shop with confidence and peace of mind. Everdeck's decking system warranty lets you enjoy your outdoor space for years to come.

### Looks and feels great

Everdeck offers a selection of stylish colours to complement your home or application. The concealed decking fastening system provides a modern look, minimising visibility of fasteners.

### Easy to care for

Everdeck decking boards do not require sanding, sealing, or staining, leaving you more time to enjoy your outdoor space.

### FSC® certified

Everdeck decking boards are FSC® certified, supporting responsible management of the world's forests.

# What is TPLY+™ Plywood?

TPLY+™, 100% Tasmanian made plywood products are widely recognized for their quality thanks to the premium Australian raw material, reputable machineries and closely monitored production processes.

TPLY+™ Plywood is manufactured in Tasmania from using Responsible Wood™ Chain of Custody, PEFC certified Tasmanian Eucalyptus (Tassie Oak).

In addition, TPLY+™ products are closely monitored by Australian authority: Engineered Wood Products Association of Australia (EWPA). TPLY+™ products are certified to AS6669:2016 (Formply standard) and AS/NZS2269:2012 (Structural standard). TPLY+™ plywood come with A bond and Emission Class Super Eo.

TPLY+™ Formply class 2 panels produce a high-quality finish on their first use if good site practices are followed. TPLY+™ offers two common sizes of Formply which are

Welcome to the future of foundations.

Biax Foundations™ is the fully patented, eco-friendly, user-friendly foundation system that offers engineers, concreters and homeowners a more sustainable foundation option.

## BIAX SYSTEM COMPONENTS

### BIAX-215

For a 300mm slab

This is considered the "primary" pod as it is the most commonly used for the main body of all slabs. This pod is used in all areas for soils up to H2 soil classification and is supplied in the highest ratio per m2 of slab area.

### BIAX-145

For a 230mm slab

This pod is used for the simple formation of "step-downs", such as patios, alfrescos, garages and wet areas. It saves the builder from having to 'profile' the site when excavating by allowing them to work with a flat base.

### BIAX-500

For a 585mm slab

The BIAx-500™ creates a significantly stiffer and stronger slab to cater for multi-story buildings with high loads and lighter residential slabs on expansive E-Class soils.

### BIAX-MINI POD™ & BIAx-ADJUSTABLE™

Utilize Biax Mini Pods and Adjustable Pods for tight spaces like edge-beams and step-downs, eliminating on-site cutting and ensuring efficient installation without compromising structural integrity.

### AUSCHAIRS

The Auschair is an innovative new combination spacer for pods and all reinforcing steel applications. With Auschair you will only ever need one type for all situations.

### BIAX KEYSTONE

The Keystone is a pivotal part of the Biax system patent. Keystones secure all the Biax pods together for a perfectly modular grid.

## OTHER ANCILLARY PRODUCTS

### Ausdrain 30mm Drainage Cell

Solutions for managing dropped edge-beams and internal steps.

### Thermal DPM & Reflective Tape

To enhance Thermal R-Value, these components can be included in the foundation design.

Made from 100% recycled plastic & 100% recyclable

Australian made

Faster, safer and easier to install

Fully compliant to Australian Standards

# SOLITEX EXTASANA®

## Weather Resistive Barrier (WRB)

SOLITEX EXTASANA® is a UV stabilised and tear resistant weather resistive barrier. It contains a non-porous, water resistant TEEE film that is laminated at high temperatures between two layers of spun bonded polypropylene.

This product is designed for use behind most typical wall cladding systems, including cavity brick, fibre-cement, masonry and other common wall systems. It is suitable for use in BAL regions up to and including BAL FZ, in accordance with AS 3959.

### ADVANTAGES:

- ✓ Weathertight & airtight weather resistive barrier (WRB)
- ✓ Outstanding durability against UV, wind and rain – up to 180 days of exposure
- ✓ Highly vapour permeable (Class 4)
- ✓ Long-term durability
- ✓ High temperature resistance - up to 120°C and down to -40°C

# 5-STEP CIRCUIT BREAKER TO KEEPING YOUR COOL ON AND OFF THE JOB SITE

## 1 STOP

PUT THE TOOL DOWN. TAKE A  
STEP BACK FROM WHAT'S FIRING  
YOU UP.

## 2 BREATHE

SLOW YOUR BREATHING. IN FOR  
4... HOLD... OUT FOR 4. REPEAT  
3-4 TIMES.

## 3 NAME IT

SAY TO YOURSELF: "I'M FEELING  
\_\_\_" (ANGRY, FRUSTRATED,  
DISRESPECTED). JUST NAMING  
THE FEELING HELPS CALM IT.

## 4 MOVE

TAKE A WALK, STRETCH, SPLASH  
YOUR FACE — ANY PHYSICAL  
SHIFT HELPS BREAK THE MOMENT.

## 5 RESET

ASK: "WHAT'S ACTUALLY IN MY  
CONTROL RIGHT NOW?" TAKE THE  
NEXT BEST STEP — NOT THE  
FIRST ANGRY ONE.

# When a Cavity Slider Needs to Do More

Automatic functionality designed to elevate cavity sliding doors.

Cavity sliders are no longer just about saving space. Builders now need door systems that improve access, control movement, and integrate cleanly into the build. The Triline Auto Cavity Slider delivers hands-free operation and controlled access within a standard cavity frame—without visible hardware or wall access hatches. It's a straightforward upgrade that adds functionality without adding complexity.

# The Balmoral Collection

Subtle, classic, and timelessly stylish

Our much-loved Balmoral Collection is expanding with a fresh release of interior door designs. We're celebrating the enduring appeal of the arched design that continues to grow in popularity across furniture and lighting to entryways and windows. At the same time, we're introducing additional geometric designs to complement our Peninsula Collection of external doors. Whether you're looking to create a cohesive interior aesthetic or introduce subtle architectural accents, the expanded Balmoral Collection provides the answer.

All Balmoral designs feature deep carved patterns on both sides, with square corner routing adding to a clean and sharp appearance. All doors from the Balmoral Collection are pre-primed, ready for painting.

## ARCHITECTURAL LOOK: STONE TEXTURE

This surface is perfect for both classic and modern style bathroom environments: the stone-textured surface creates an architectural feature keeping a pleasant tactile sensation.

The pattern replicates a stone slab without the wear and tear of the natural stone: the surface is not porous, extremely smooth (but anti-slip certified) and easy to clean.

## HOME SAFETY

**SAVINGS UP TO 35%**

The Legrand Photoelectric Smoke Alarm provides fast response to smouldering fires and detects visible particles of combustion quickly. Its design includes a radio transmitter that wirelessly triggers all interconnected smoke alarms, eliminating the need to run interconnect wires. You can be assured of the best protection since any time one smoke alarm sounds, all interconnected alarms will sound simultaneously, alerting occupants right away and ensuring fast evacuation if necessary.
